

Dornier MedTech

Dornier

Relax+ Endo

Where versatility meets quality

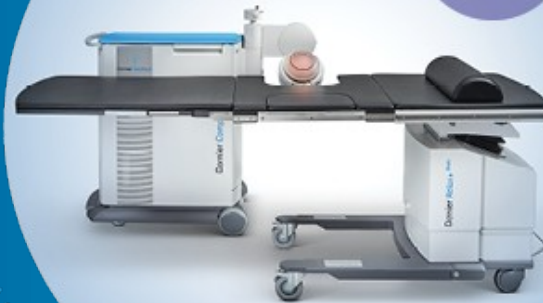

Why Relax+^{Endo}

Versatile system for seamless integration

Ergonomic design for patient comfort
and safety

Proven technology for optimized workflow
efficiency

FOR LITHOTRIPSY

FOR ENDOUROLOGY

1 Radiolucent carbon fiber

- Promotes operator safety with reduced radiation exposure
- Radiolucence of carbon fiber offers more freedom on patient positioning during imaging

2 Dornier UroTilt

- Enables tilt along the isocentric and non-isocentric axes to achieve patient positioning

3 Unified hand controller

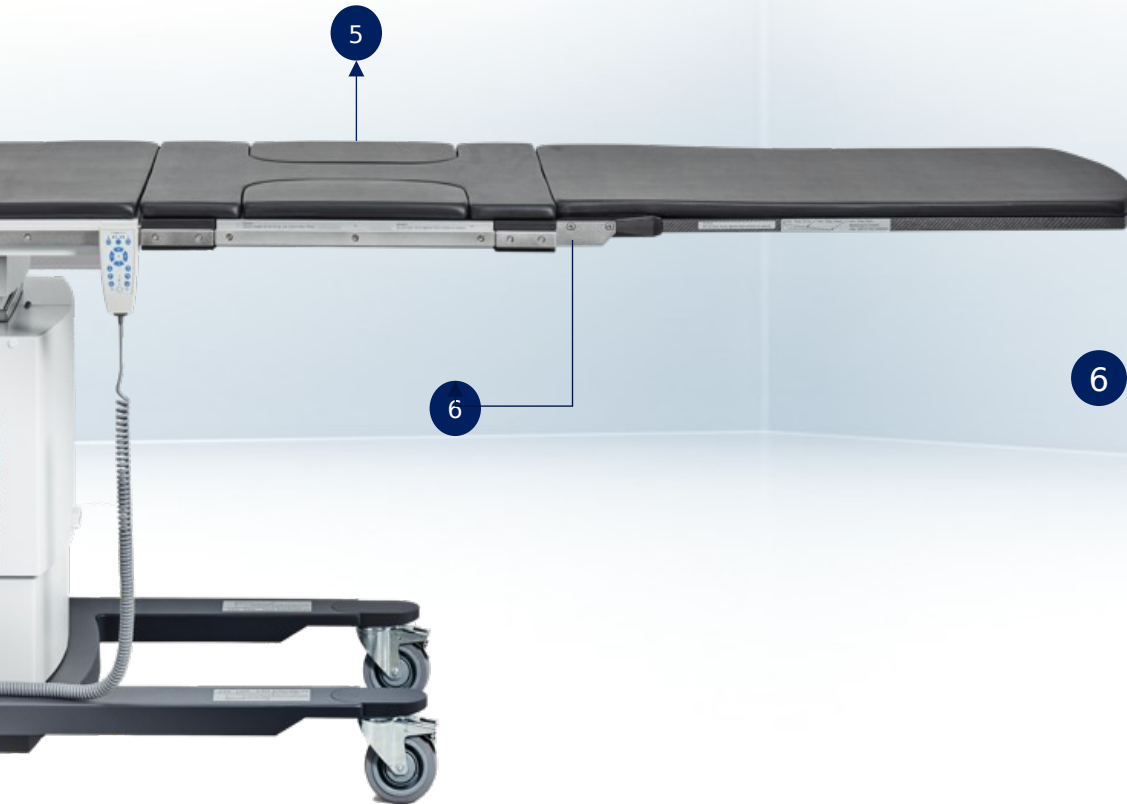

- Facilitates precise patient positioning and table movements with a touch of a button when used with Dornier Delta® III series

4 Portable

- Transports easily; the brake pedal on the side can be set to three different configurations

Highly compatible
with most
third-party
C-arms

5 Modular design with removable sections

- The single, dual or zero cut-out mid-sections make this urology table ideal for lithotripsy and endourology

6 IPX2 drip-proof

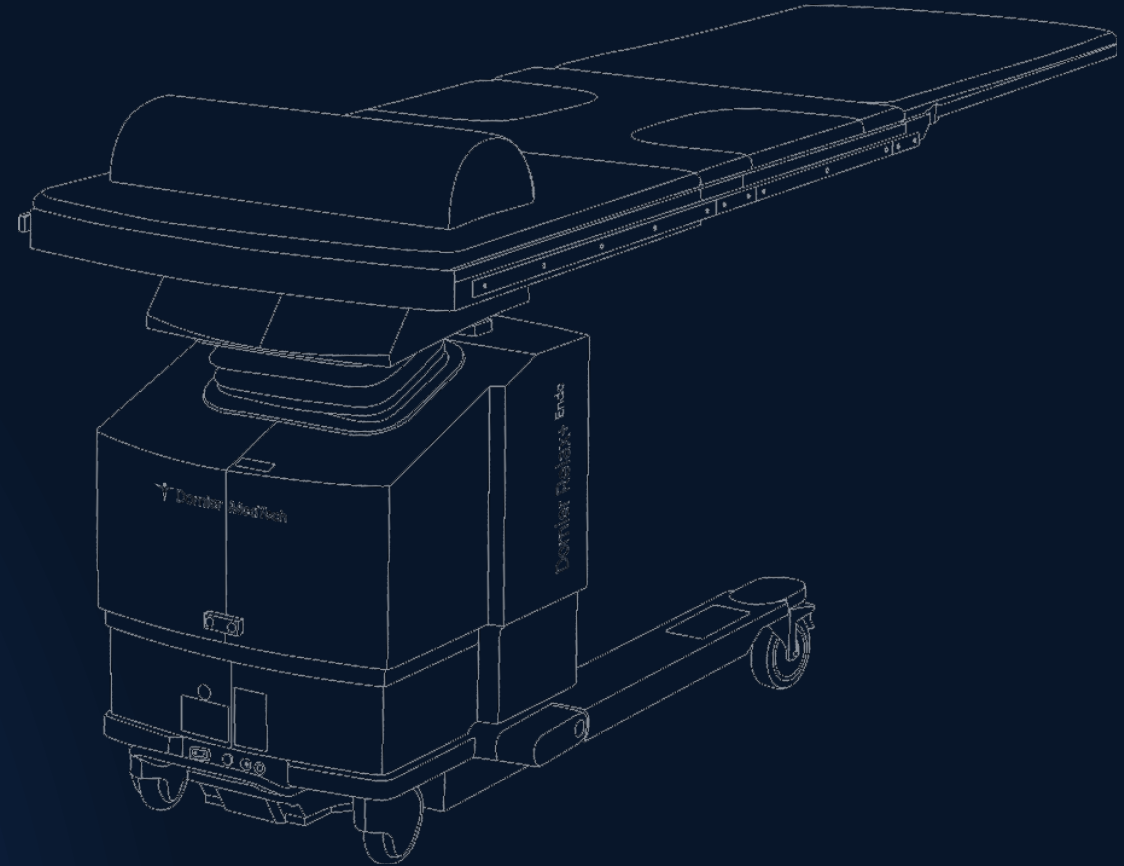

- Added protection from water damage, even when tilted at 15°
- Features a protective cover and prevents fluids from leaking into the circuitry
- Essential during endourology procedures

Optional accessories

- I.V. pole
- Arm board with gel pad
- Multi-axis foot pedal
- Head extension
- Arm restraints and leg holders
- Positioning wedge
- Bolster
- Pediatric ESWL insert
